

### Guided Reading

In guided reading we shall be reading The Wind in the Willows.

### English

In **English**, we will focus on:

- Non-chronological reports
- Narratives
- Poetry

We shall be linking our English with our theme. Basic skills, handwriting and SPAG will be embedded in English and foundations subject lessons. The children will have opportunities to write about what they have been learning and display their knowledge and skills in a variety of different text types.

### Maths

In **Maths**, we will focus on:

- Number and place value
- Addition and subtraction
- Multiplication and division

There will be a strong focus on recalling number bonds and multiplication facts. Children will be using all of this knowledge to develop their fluency, reasoning and problem solving skills.

### Theme

Our Wet and Wild theme focusses on water and it's impact on the world around us. We will be looking at the water cycle, rivers and how water is essential to plant life.

## Year 3 Term 1 : Wet and Wild

### Recovery Curriculum

The Recovery Curriculum is built upon the five levers to reignite the flame of learning in each child. Our first step will be to rebuild relationships with peers and adults and establish new relationships together. We will assess individual needs and give pupils a voice to move their learning forwards after lockdown. Routines will be re-established, gaps in learning addressed and emotional resilience rebuilt. Finally, we will focus on relearning past skills and rebuilding confidence whilst maintaining a broad based and balanced focus throughout.

### Well—Being

There will be a daily emphasis each day on children's well being that will focus on past, present and future emotions. We will be teaching the children to find positives in themselves and in others through different activities. These activities include having a worry box in each classroom and creating a jigsaw puzzle representing how we fit together as a class.

### WOW EVENTS

We want to take advantage of our amazing environment in Year 3 this term. We will be exploring our local environment, visiting local rivers and hopefully, wetland habitats.

We will also be showcasing all of the amazing work the children are going to produce.

### Geography

As geographers we are looking at the physical features of rivers and our local area and combining this with our geographical field skills to develop our understanding of natural water cycles.

### History

As historians we will focus on the history of our local area specifically looking at the development of the docks in Hull. We will be linking this to our understanding of the physical features of rivers and the sea.

### Science

During this theme, there will be lots of opportunities for the children to work scientifically. We shall be conducting experiments to demonstrate the water cycle, the movement of water in plants and the flow of water in our rivers and streams!
